## **Centric's digital employee file certified by SAP**

**Centric Employee File for SAP solutions recertified by SAP – current version 3.0 now with extended features**

Essen/Hamburg, December 1<sup>st</sup>, 2020. Centric Employee File, the digital employee file for SAP developed by Centric Germany, has received the SAP certification for the third time in a row. The SAP certificate confirms that Centric Germany's solution complies with all SAP requirements in terms of security and product quality. The solution is based on the SAP Cloud Platform, meets data protection requirements and features numerous functions and security standards for archiving personnel documents. As a cloud solution, it can be adapted flexibly in line with a company's growth.

As an SAP specialist and SAP Silver Partner, Centric Germany has spent many years advancing its employee file solution. The product's consistent quality has now been confirmed by SAP through repeated certification. Jens-Peter Hess, CEO of Centric Germany: "SAP's seal of quality enables us to create trust with existing and potential customers. It confirms Centric's leading role when it comes to product quality, security, architecture and functional scope."

The digital Centric Employee File solution makes it possible to file and archive all necessary information and documents relating to an employee. Documents from SAP SuccessFactors and SAP HCM can be accessed from any location, and both from PCs as well as mobile devices. A wide range of document types can be archived flexibly using various channels. Centric put a special focus on security and data protection during the development of version 3.0 of its employee file solution. As a result, the product complies with all security requirements applicable to the management of personnel documents. Based on the SAP role concept, for example, access permissions can be controlled down to the level of individual documents, and critical processing steps such as deleting and moving documents can be monitored.
